

Components kit for rigging equipment

The maritime industry is closely related to the use of rigging. As on land, rigging in the maritime sphere plays an important role in lifting and moving cargo on ships.

This allows the crew to carry out sea transportation with safety and efficiency. Rigging elements such as ropes, slings and lashings are used to lift and secure loads on the ship, ensuring their stability while sailing.

In addition, rigging in the marine industry has special characteristics to withstand the effects of salt water, strong winds and other marine conditions.

Product code: 1613106100

Components kit for rigging equipment

- Screw auger - Ø18 mm
- Cargo hook - 4 t
- Hook for swivel tackle - 1,2 t
- Snatch-blocks - 1,2 t
- Turnbuckle with mousing-hook - *
- Turnbuckle with open stamped sleeve - 2 kN
- Jigger-tackle polypropylene Ø14 mm - L 50 m
- Thimbles, marine type, plastic - Ø28 mm
- Big rundle - 1800x115x25 mm
- Small rundle - 480x115x25 mm
- Rubber rundle - *
- Medium rundle - 1100x115x25 mm
- Thimbles, marine type, steel - Ø95; 30; 38; 45; 56 mm
- Double-sheaved block - II-65GK
- Double-sheaved block - II-65U OM1
- Double-sheaved block - II-75UK
- Single-sheaved block - I-50U OM1
- Single-sheaved block - I-75U OM1
- Single-sheaved block for ropes - Ø15 mm
- Control lanyard - L 30 m
- Floating lifesaving line Ø10 Polypropylene - 30 m
- Polyethylene liner - *
- Heaving line - *
- Clips for sea ladders
- Heaving mallet
- Worming shovel
- Locksmith's cross-cutting chisel - *
- Serving mallet - *
- Rigging cutter - *
- Replacement coupling head (set of 13 pcs) - *
- Rigging apron - *
- Marking pin - *

* - Unit size according to the order
