

Portable Foam Applicator Unit

The portable foam applicator unit is used as effective additional or alternative means of firefighting. The kit comes with the manufacturer's certificate of quality. Portable foam kits are used in maritime transport, are placed at the fire hydrants, in the machinery spaces, on the deck, etc.

The portable foam applicator unit powered by fire extinguishing system is completed with:

1. Foaming agent tanks with a capacity of not less than 40l
2. Hose connection to the trunk of the SVPE-4 or SVPE-2 vessel, which are designed for air-mechanical foam from the aqueous-based solution to extinguish the fire

Specifications:

- The range of solid water jet at a pressure of 0.6 MPa - at least 18m;
- The multiplicity of the foam at the outlet of the barrel - 8;

Product code: 1813101100
