

Armored collision mat

An armored collision mat is used to patch underwater damages or hull breaches in any part of the vessel, regardless of the configuration of the damage. The armored collision mat is the most durable of all collision mats.

Armor and the leech rope of the armor are made of wire rope. Mat cover is made of special marine boiled canvas, with waterproof impregnation. The armor prevents the canvas from being pressed into the breach by water pressure.

The armor collision mat 4.5 x 4.5 m is planted using 2 pulley hoists with a carrying capacity of 1.5 tons and 2 pulley hoists with a carrying capacity of 1 ton.

The product complies with SOLAS.

Specifications:

- Size - 4,5 x 4,5 m (Canvas layers - 4 pcs.; Interlayer - 1 wire netting with leech rope)

Product code: 1611103100
