

CO2 Fire Extinguisher-2

CO2 fire extinguishers with a rating of 1.4 are designed to extinguish fires involving flammable liquids and molten materials (Class B fires) and fires involving electricity-generating equipment under voltage up to 1000 V (Class C fires), where oxygen is present. These extinguishers use carbon dioxide as the extinguishing agent, which works by rapidly expanding the gas volume and emitting cold.

They can be used within a temperature range of -20 °C to +50 °C and have an operational lifespan of 10 years.

We conduct annual maintenance on these extinguishers at our customers' premises.

Product code: 1815102100

Specifications:

- Volume of shell - 3 l;
- CO2 content - 2 kg;
- Fire-killing capability - 21B;
- Fire extinguisher full weight, not more than - 8.5 kg;
- Minimal jet length - 2 m;
- Discharge time - from 6 to 13 sec;
- Height - 599 mm;
- Diameter - 108 mm;
