

Collision mat

Emergency collision mat is used to patch damages or hull breaches with sharp uneven edges. The backbone is a mat, thrummed with a pitch line with a circumference of 75 mm and two layers of stitched canvas patch. The thrum is made of sisal rope-yarn. The patch is laid to the breach with the side on which the thrummed mat is sewn.

The collision mat is planted using pulley hoists with a lifting capacity of 1 ton (2 sets).

Delivery set: protective cover, iron cramps, snatch blocks, lowering lines, keel hauling lines, swiveling pulley hoists with can hooks.

The product complies with SOLAS.

Specifications:

- Size - 2.0 x 2.0 m;
- Canvas layers - 2 pcs.;
- Interlayer - 1 pad;

Product code: 1611102100
